VICTORIA KAYODE

Atlanta, GA | 470-985-6669 | damisikayode03@gmail.com | victoriakayode-portfolio.netlify.app

PROFESSIONAL SUMMARY

Computer Engineering graduate (Cum Laude, GPA 3.57) with hands-on experience in AI model training, digital product strategy, and end-to-end hardware-software development. Proven ability to define user requirements, manage cross-functional teams, and deliver data-driven recommendations.

SKILLS

PM & Strategy: Figma, Jira, Notion, Agile/Scrum, User Story Mapping, Product Roadmapping, OKRs/KPIs, A/B Testing, User Research
Engineering & Hardware: Python, C++, JavaScript, HTML/CSS, VHDL, Raspberry Pi, Arduino, PCB Design (Eagle), AWS IoT, Fusion 360
Soft Skills: Stakeholder communication, technical documentation, cross-functional leadership, customer discovery, data-driven decision making

WORK EXPERIENCE

AI Product & Research Analyst · **Handshake AI Fellowship** · Remote · *November 2025 – Present*

- Designed and evaluated 100+ domain-specific prompts assessing LLM performance in computer engineering and embedded systems, directly contributing to frontier AI model accuracy and reliability.
- Conducted independent technical research to support prompt development, analyzing AI-generated outputs across hardware, software integration, and systems design for correctness, clarity, and depth.
- Delivered structured evaluation reports to leading AI research labs, identifying model gaps and providing actionable feedback that improved AI understanding of complex engineering concepts.
- Maintained 100% task completion rate across all assigned projects, working asynchronously in a high-accountability remote environment.

Digital Product & AI Strategy Extern · **News Corp** · Remote · *August 2025 – October 2025*

- Designed and launched user surveys reaching 500+ participants, capturing audience behaviors, engagement trends, and digital media preferences to inform product decisions.
- Conducted research on AI-powered personalization, analyzing platform algorithms and user interaction data to identify opportunities for increasing engagement by 15–20%.
- Produced actionable product recommendations for digital teams, resulting in a projected 10–15% improvement in content relevance and user retention.

Operations & Customer Experience Associate · **The UPS Store** · Atlanta, GA · *January 2025 – Present*

- Processed 50+ daily transactions at 98% accuracy; diagnosed and resolved 10+ recurring POS errors, improving checkout efficiency by 18%.

FEATURED PROJECTS

LOCIT — Wearable Location & Safety Device (Senior Capstone) · *December 2024*

- Defined product vision and requirements for a wearable safety tracker; translated user needs into technical specs for GPS tracking, facial recognition, and geofencing — achieving 98% location accuracy.
- **Owned full product lifecycle:** led cross-functional team through ideation, prototyping, user testing, and on-time delivery of all milestones.
- Designed and iterated UI/UX in Figma and FlutterFlow; usability testing improved task completion by 20% and reduced device-app sync failures by 40%.

Raspberry Pi Weather Station · *March 2024*

- Engineered an IoT data pipeline logging 500+ environmental data points daily at 95% accuracy; maintained full system architecture and troubleshooting documentation.

Arduino Motion Detection Game · *February 2023*

- Shipped a real-time embedded product from concept to demo; iterated on design based on feedback from 5+ testers, achieving 90–95% motion detection accuracy.

EDUCATION

B.S. Computer Engineering — Cum Laude · GPA: 3.57 · *Kennesaw State University, Kennesaw, GA · December 2024*

Relevant Coursework: Advanced Embedded Systems, Data Collection & Sensors, Actuators & Integration, Senior Project Design

LEADERSHIP

- **NSBE Programs Committee Member:** Coordinated 3+ workshops and panels, increasing student participation by 40%.
- **SWE Outreach Chair:** Led 5+ STEM events engaging 200+ K–12 students, promoting engineering to underrepresented youth.
